

## When 3 Functions Isn't Enough!

This very efficient Rotary Pneumatic Hammer drill offers a "4<sup>th</sup> Function" over the standard 3 typically found in these types of tools.

1. Drilling without hammer action
2. Drilling with hammer action
3. Stop rotation (non powered) with hammer action and the accessory bit free to spin on it's own. This is ideal for demolition work
4. Stop rotation (non powered) with hammer action and the accessory bit is fixed from rotating. This is ideal for lifting tiles.

CARBON  
FIBRE

Also featuring carbon Fibre and Magnesium construction for the ultimate in strength, durability and reduced tool weight. The body also features Brush Show for easy access to the brushes for easy replacement.

A safety clutch mechanism provides an increased level safety to the operator should the accessory become jammed. The Power GLO neon also adds safety by indicating when live power is available to the tool

## SUPER **COMPACT** DESIGN

Our new shorter compact design over traditional body length styles typically found with this type of tool allows for access into tighter work spaces and better balance for safer use.
